# Evolving Safety Performance

- **iMPLEMENT** is a data-driven decision making process that:
  - **Assesses the current status** of aviation
  - **Identifies the best solutions** in order to maintain or improve the aviation capability of the State
  - **Evaluates the needs of the aviation system** (money, people, infrastructure)
  - **Identifies resources** through existing national, regional, or global mechanisms
  - **Showcases the real added value of air transport** and the socio-economic return on investment of aviation
